

## eMerge<sup>TM</sup>

When it comes to patient recruitment, any tool that streamlines the process and speeds time to end of enrollment has value. With eMerge, study teams, sites and sponsors have a central communications portal that can ease the recruitment process, and get your clinical trial completed faster and within budget.

### Easy to navigate, fully customizable

It all begins with a dynamic home page customized by your level of access—Study Site, Study Team, Sponsor, or Admin. From there, users can quickly navigate to learn more about study recruitment progress, find key study documents (such as protocols and study tools), re-order materials, respond to surveys and much more.

### Built-in Pre-ID speeds the recruitment process

Want to know how many patients any given study site might be able to provide from their database? Use the eMerge Pre-ID module to find out. It's all secure and HIPAA compliant. Sites simply log in, answer high-level IE questions and record the result on the patient's chart. Study teams can then generate reports to find sites with the most potential participants. They can even discover which IE criteria caused the most screen fails. Have a need that's not covered in the current modules? We can make it happen. To learn more about eMerge, contact Account Director, Lindsay Jackson for a demo. [Lindsay@mergellc.com](mailto:Lindsay@mergellc.com) 919-832-3509

#### eMERGE OFFERS:

- Current stats on recruitment efforts
- Central location for important study documents
- Pre-ID capabilities
- Recruitment/retention materials re-ordering
- Centralized communication with sites
- Site feedback & survey function
- Site forum to share best practices

Collect site feasibility data, order patient recruitment materials, and even track your recruitment progress online. With eMerge<sup>TM</sup>, instant access is a click away. Contact your Merge representative for a demo today.
